DIGI AXESS VPN WITH BUILT-IN CELLULAR CONNECTIVITY

Digi Axess VPN is a fast, secure, scalable, and user-friendly VPN solution designed for remote management. It enables seamless access to Z45 controllers and other connected devices without requiring public static IPs.

Built for affordability and reliability, it ensures high uptime with redundancy features and integrated cellular data for uninterrupted connectivity. Digi Axess VPN stands out with a streamlined user experience and high-value alternative that outperforms in both capability and cost. This cost-effective solution provides a robust private network for secure operations, ensuring businesses stay reliably connected.

Ideal for Digi Z45 Industrial Controller customers and businesses needing secure remote access, it integrates with Digi Axess for effortless connectivity and reliability.

Main Features

- Secure remote management: private network access without relying on public static IPs
- Integrated cellular connectivity: always-on, secure, and reliable network access
- Seamless connectivity: designed for uninterrupted access with high uptime
- Affordable and scalable: competitively priced with options for business growth
- Ease of use: intuitive setup and integration with Digi Axess
- Enhanced security: eliminates IP guessing and device pooling concerns

- Ideal VPN solution for Digi Z45 Industrial Controllers
- Easy to maintain and support
