PRISMATIC SUPERCAPACITORS - ULTRA COMPACT BUT STRONG

STELIAU
TECHNOLOGY

The perfect solution for high-power, immediate energy storage and release.

Ultra-thin, high-performance Supercapacitors. SCHURTER introduces its new line of Prismatic Supercapacitors, setting a new standard in energy storage solutions. These supercapacitors combine high power density, extremely low ESR (Equivalent Series Resistance), and ultra-thin form factors, making them the ideal choice for demanding electronic applications.

SCPA-Ultra-thin design for space-constrained applications. The thinnest model is just 0.4 mm - the worlds thinnest Supercap with high power.

SCPB-Optimized for applications requiring high durability. Excellent low temperature perfomance.

SCPC-High-capacitance solutions for energy-intensive applications with high temperature rating.
