NEW SOM BASED ON THE NEXT-GEN STM32 MPUS BY ST®

Introducing our latest advancements: the SmarCore STM32MP25x and i.Core STM32MP25x. modules, powered by the cutting-edge STM32 MPUs from ST® Microprocessors. Designed for the demands of Industry 4.0 and advanced edge computing, these EDIMM 2.0 and SMARC SOMs boast an industrial-grade 64-bit MPU, ensuring both security and performance.

Equipped with single or dual Arm® Cortex®-A35 processors clocked at up to 1.5 GHz, alongside an Arm Cortex-M33 running at 400 MHz, and a Neural Processing Unit (NPU) delivering 1.35 TOPS, these modules are tailored for tasks requiring high-end multimedia capabilities. With support for time-sensitive networking and a 3D GPU, they excel in robustness, extended connectivity, high-end graphics, and robust security features.
