

# NV104 10.4" NIGHT VISION ALL-WEATHER MONITOR

The Lilliput 10.4" industrial monitor features night vision and day/night mode, 1000 nits of brightness, and high readability even at 0.03 nits. It incorporates optical bonding to eliminate the air gap between the glass and the panel, improving transparency and reducing internal reflections. The display offers a long LED panel lifespan of up to 50,000 hours, making it suitable for intensive use. Thanks to an integrated smart heater, it withstands a wide temperature range of -30°C to 70°C, allowing operation in extreme weather conditions. The monitor is usable with gloves of various materials and even with wet hands, maintaining high touch sensitivity. It is designed for demanding applications such as marine cabins, off-road vehicles, and industrial environments with dust, humidity, or vibration. Its robust construction and performance make it a reliable solution for 24/7 monitoring, both indoors and outdoors.
