

WEHO 12V 24V POWER SUPPLY 400W TRANSFORMER LED SLIM DRIVER

- Versatility: Supports 12V and 24V output, providing flexibility for different LED lighting configurations.
- High output power: Capable of delivering up to 400 watts of power, suitable for driving multiple LED lights or high power LED lighting systems.
- LED specific design: Designed for LED lighting applications, ensuring optimal performance and compatibility with LED luminaires.
- Reliability: Manufactured from high quality components with overload, short circuit and temperature protection to ensure long term reliability and prevent damage.
- Safety certifications: Compliance with safety standards (such as CE, RoHS, UL) ensures that the power supply meets the necessary safety requirements.
- Easy to install: Several mounting options and a user-friendly design make installation simple, even for non-professionals.
- Temperature management: Efficient cooling mechanisms, such as built-in fans or passive cooling, help regulate temperature and prevent overheating.
